

ENVIRONMENTAL POLICY

Resource Water Group (RWG) specialises in test pumping methods for the purposes of assessing aquifer properties and pumping capabilities of groundwater bores.

RWG carries out other works associated within the water resources sector.

This Policy is applicable to all work carried out by RWG and applies to employees, visitors and sub-contractors.

RWG is committed to:

- Management System alignment to ISO 14001
- Regularly reviewing the effectiveness of environmental systems and programs
- Setting, assessing and reviewing specific objectives and targets
- Planning for and providing systems of work to:
 - Protect biodiversity and ecosystems
 - Climate change mitigation and adaptation
 - Improve sustainability in systems and processes
 - Prevent environmental damage and pollution.
- Continual improvement
- Complying to all relevant client, legislative, industry and other requirements
- Providing appropriate information, instruction and training to employees to ensure they can carry out their roles in a manner consistent with the company's standards
- Ensuring all employees, sub-contractors and visitors are informed of, and understand their obligations, under this policy.
